As a branch of mathematics, statistics requires high-level numeracy and quantitative skills as a foundation. However, that's only the beginning. Being a statistician is a bit like being a detective - you need superb analytical skills to determine whether your data is statistically significant, properly interpret it, and test whether your ...

For the Department of Mathematical Sciences, pure and applied mathematics are integrally linked. Members of our faculty work in subjects as diverse as combinatorics, algebra, graph theory, functional analysis, dynamic systems, and geometry/topology. We also have a very strong program in probability and statistics.
